## What Carreno Says of Scionti.

There has been a great deal said of the performance of the Italian pianist, Silvio Scionti, by the musical critics on the city papers, but none of the more expressive than the language used by Teresa Carreno, the world's greatest woman pianist. "When he began to play I started up in amazement. One thing he played was a movement of the Martucci Concerto, which is one of the most tremendously difficult things in pianoforte literature, and how he played it! He seemed not to mind the difficulties in the least. His technique is remarkable, and then he plays with such a big, broad style and such beautiful qualities of tone! I consider him destined to take the place of Rubinstein."

The Mothers' and Teachers Club of the Buchanan street school will meet this afternoon at 3:30 o'clock at the school. A large attendance is requested to be present.

## NEW DECISION ON TAX COLLECTIONS

Special to Tulsa News.  
Tulsa, Okla., Dec. 7.—County Attorney Pat Malloy has handed down an opinion in reply to an inquiry from the Midland Valley railroad that may establish a precedent in the collection of taxes throughout the state. Mr. Malloy holds in substance that the taxpayers have until January 1 to pay the first half of their taxes, and until June 15 to pay the balance, and that the penalty does not go into effect until after these dates. Mr. Malloy says the 1911 session laws amending the 1910 tax law is obscure in this particular and a literal interpretation would be absurd. He reached his conclusion from a joint consideration of the 1910 and 1911 laws together.

## LARGER WHEAT ACREAGE SHOWN OVER LAST YEAR

It is stated by those interested in farming advancement in this section of the country, that there will be a great increase in the crop acreage for next year. This fact is attributable, it is stated, to ample moisture this fall, and the increased desire to get return on moneys invested in lands.

The crops of wheat will be somewhat larger, and the oat acreage will also be increased. There is a strong tendency upon the part of those having lands suited to the growing of alfalfa to get this rich crop started with as little delay as possible. It is stated that the outlook for heavy plantings of alfalfa have never been so great as at present. The little valleys on the canyons and creeks, the lakes and other suitable locations are being prepared for the seeding. That row crops will also show great expansion none will question. The people are awaking to the importance of the farm as a developer, and are not going to allow a falling away while the rich acreage of the Panhandle is so open and unoccupied as it is at present.
